

can supply current to any separate load up to a limit set by current-sense transformer **T1**, and sense resistor **R1**. **T1** improves efficiency by lowering power dissipation in **R1**, i.e., turning ratio (1:70) via the total battery-plus-load current through **R1**. This causes a feedback voltage so **IC1** can limit the current to a level compatible with assistant components. A diagram of a model is shown in **FIG. 4A** as requested by the **P T O**, such as to demonstrate its operability. The chargers **H3-H4** are connected to one another via the converters **V3-V4**. Consequently, two leads proceed from this charger **H3**, and is connected to the converter **V3**. While two leads proceed from the charger **H4**, the leads each of which is thereby connected concerning the converter **V4**. Since a lead proceeds from the adapter **A3**, and is connected with the charger jack 2, a lead proceeds from the adapter **A4**, and is connected by way of the charger jack 3.--

Commandments Relating to God

AND God spake all these words, saying,
2 I am the LORD thy God, which have brought thee out of the land of Egypt, ^Rout of the house of ^Tbondage. 13:3 • slavery
